Profile

I am a Full Stack Web Developer with a background in retail management. With my experience in customer service, I intend to bring strong communication skills and a focus on an exceptional user experience. I enjoy working with teams and using my strengths to help others, as well learning from other's seeking their feedback to continue my development. I recently completed the Full Stack Web Development Bootcamp through the University of Minnesota and am looking forward to continuing to learn new technologies.

Skills

HTML/CSS, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, GIT, MongoDB, MySQL, Handlebars, Heroku, Microsoft Office, Photoshop

Projects

Pretty Dorky RPG | Full Stack Developer

Application: An RPG using React that includes a login/sign up page with a running/jump game that will take the player to a battle scene.

Role: Use keyframe animations for characters and background images for game scenes and helped in creating logic that takes character to battle scene. Using API calls to update character state from level to level.

Deployed Link: pretty-dorky.herokuapp.com

GitHub: github.com/LindseyM20/team-rpg

Dreamy Collector | Front End Developer

Application: To keep track of your Animal Crossing villagers and possible villagers to move in.

Role: Design login, sign up, and home page using HTML and bootstrap elements styled with custom CSS as well as mobile responsiveness. Set up passport login to use MySQL to save user information

Deployed Link: floating-earth-07738.herokuapp.com/login

GitHub: github.com/B-Audette/animal_crossing_dream_island

Weather Dashboard | Full Stack Developer

Application: Search weather for any city

Role: Use API calls to search for current and 5 day extended forecast. Uses DOM manipulation to show information and local storage to save previous searches.
